

Boltgun

The bolt gun is a small hand held weapon. The one shown is a standard-issue 2100-AS Boltgun.

Controls

All enforcement forces are issued with a bolt gun. The palm lock ensures no un-authorized use. To key the palm lock to your palm first press down on the lock area, then switch it on. There will be a beeping sound then it will switch itself back off again until the owner turns it on. To re-initialize the lock you must have a qualified technician take the palm lock's chip out, wipe it then put it back in. On some models there is a special device that if the boltgun is away from the owner's flesh for more than a week, it will disintegrate.
