

Imperial PowerCommander printer

The printer comes in several different styles. The one shown is a black and white Zenon 2000.

The PowerCommander Zenon 2000 black and white printer is small and economical. The *suak* paprus is the normal type of paprus to use in a printer like this. There is a switch to select between normal paprus and coated. The power pack lasts for up to 10 days with normal use.
