

Saadium Terminator-Class™ Lasgun

The Terminator-Class Lasgun is the most powerful weapon in the Empire. The old 4500/SS was too inconvenient for situations where even the shortest delay could mean instant death. There were too many controls, so the Srta Imperium came up with the Terminator-Class Lasgun. This is a hand-held version of the Devastator Lascannon used on the battle grounds of a thousand worlds. There is no variable beam width or strength controls on the Terminator-Class Lascannon. Instead, the weapon is set at the most efficient and destructive settings available. It is powered by a new design of energy converter: the QIPM (Quad Inline Power Module.)

The auxilliary power pack is used if the QIPM fails. The average discharge per shot is about 1 MW.
