

Technologies of the Saadiumm Empire

Here is a brief description of the technologies of the Saadiumm Empire

- Coldlight: This is similar to a lasgun beam but infinitely more powerful and infinitely more accurate. In addition, the beam is invisible. It can be used for communication and high-resolution optical images. Lasguns are starting to use the coldlight technology for more powerful weapons.
- Darkscanner: This is a small hand-held device used for for scanning just about anything.
